

Discworld Stamps Mount List

envisioned and created by Charles Braham (Murgatroyd)

Some time ago I decided to try and obtain a set of stamp mounts with which to mount all my Discworld stamps in my albums. This proved to be a more complex task than I had envisaged. I first had to select which variety of mounts to use... I settled on Hawid clear backed mounts, because the larger ones had both an upper and a lower closure, and thus could be trimmed and adapted to mount awkwardly sized items. I also decided to buy strips of mounts and an inexpensive guillotine with which to cut them to size. The entire order came to within a smidgin under £100.00, (excluding some non essential accessories), somewhat more than I had anticipated. I must confess that I haven't actually mounted the collection yet as I'm still working on my Album Pages, a task fraught with nit picking detail and sheer bloody hard work. This many take some time!

It was the huge variety of Discworld stamp sizes that gave me a hard time. I picked a number of Mount strip sizes that seemed to be the closest available to the various heights of the stamps and then created this list with both the width and the height of the stamps and stickers. I then colour coded the list so as to be able to work out how many of each different pack size to order. When I was done I found to my surprise that after calculating the total width of the individual stamps in each height category I could just get away with one pack of each of the sizes I had chosen... (NB. At that stage I hadn't added mounts for the Stickers, Labels and Cinderella stamps. It is possible that they will require the purchase of more strips, or some conversion of your left overs!). I hope others may find this of help. Steve has been kind enough to edit the colour coding on the list to make it more readable, and I owe him a vote of thanks for allowing it to be added to his wonderful stamp catalogue.

In some cases some of the larger items may require some modification of the mounts for a secure fit, either by removing a section of the rear (adhesive) side of the mount, or by splitting the rear (adhesive) side of the mount so as to accommodate some slightly larger items. In these cases I've listed the most suitable sized mount for conversion.

Scott Stamp Mounts are manufactured by Prinz, so refer to the Prinz size list for Scott mounts. Lighthouse Stamp Mounts are manufactured by Hawid, so refer to the Hawid list for Lighthouse sizes. However Scott mounts and Lighthouse mounts may well be sold with a different number of strips in each pack, so some research may be required.

Please note that there are mount sizes manufactured that will more accurately fit some Discworld stamps. The ones chosen represent a reasonable compromise between the most suitable mount sizes and the aim of economy, that is to say the avoidance of having to purchase too many different sized packs and then only using a few out of each pack. Trimming your mounts, not only off the strip but also in height, will result in neatness and a good fit for each stamp.
